Summary

- I graduated from the faculty of Computing and Data Science at Alexandria University and began working as a mobile app developer.
- Through working on various real-life projects, I have gained practical experience that aligns with the needs of companies today.
- I use Flutter for mobile app development to create Android and iOS apps, I can also generate a web app using a single code base.

Education

- Student at Faculty of Computing and Data Science.

2021 - 2025
Alexandria, Egypt

Experience

MemChat– Flutter Developer July 2025 – Present

Alexandria, Egypt

- Design and implement mobile apps with Flutter, ensuring seamless performance on both Android and iOS platforms.
 - Create modern, adaptive user interfaces focused on smooth user experiences and clean design.
 - Connect applications with RESTful APIs while managing advanced navigation and interactive features.
 - Apply robust state management patterns like Bloc and GetIt to maintain scalable and maintainable codebases.
-

MDARJ – Flutter Developer [view](#) May 2024 – June 2025

Alexandria, Egypt

- Developed and deployed multiple mobile applications, resulting in a portfolio.

- Maintained effective communication channels with clients, ensuring a thorough understanding of project requirements, leading to the successful delivery.
 - Among the projects within the agreed time frameworks and budgets, thus ensuring the customer's satisfaction.
 - Leveraged a diverse range of cutting-edge technologies and programming languages to craft mobile applications that consistently meticulously.
 - Demonstrated optimal performance, superior functionality, and seamless user experiences.
-

TopProz – Flutter Developer [view](#)

June 2025- Oct 2025

California, USA

- Develop and maintain cross-platform mobile applications using Flutter for Android and iOS.
 - Build responsive, user-friendly UIs aligned with modern design principles.
 - Integrate RESTful APIs and handle complex user interactions and navigation flows.
 - Collaborate with product managers, designers, and backend developers to deliver new features.
 - Utilize state management solutions such as **Bloc** and **GetIt** for scalable architecture.
 - Conduct code reviews, write clean and maintainable code, and follow best practices.
 - Contribute to improving the app's architecture and user experience continuously.
-

Freelancing [view](#)

Flutter Developer

Present

- Developed and delivered multiple Flutter-based applications for diverse clients, ensuring highquality and user-friendly solutions.
 - Collaborated closely with clients to gather requirements, provide technical insights, and deliver tailored mobile applications.
 - Maintained clear communication throughout the project lifecycle to ensure client satisfaction and timely delivery.
-

Backend Developer

Present

- Designed and implemented scalable backend solutions for various client projects, ensuring robust performance and security.
- Engaged with clients to understand their technical needs and translated them into efficient backend systems.
- Delivered projects on time while maintaining effective communication and addressing client feedback.

Projects

- Wasfa
- Al Manhal
- Doctor's Clinics
- MedicalAcademy (Courses App).
- WhiteBoard.Drz (Courses App).
- TChat
- Request (Contractors App)
- E-commerce with Admin Dashboard
- Space (Medical library for medical students)
- Tansieq (Ministry of Saudi Hajj)
- Medical System.
- El Rashedy Accounting System.
- Movie.
- Ninja (Delivery App)

Skills

- Technical skills:

- Dart • Data Structures • OOP • Solid Principles • Design Pattern
- Flutter • Bloc Pattern • Clean Architecture • Git & GitHub
- RESTful APIs • Firebase • Clean Code • Problem-Solving
- CI/CD • UI/UX • Testing • Node JS • Express JS • MongoDB • SQL.

- Soft Skills:

- Agile development methodologies.
- Communication Skills • Team Player.

Languages

- **Arabic:** Mother tongue
- **English:** Good
